## ABOUT ME

I am an undergraduate informatics student at President University with a passion for software and website development. I am flexible, hardworking, responsible, and honest. I excel in team environments and can take the initiative when needed. I listen effectively to solve problems and am always enthusiastic about learning and taking on new challenges.

## WORK EXPERIENCE

**Web Developer, Annora Total Solusi**                                    Apr 2024 - Dec 2024

Developed a Warehouse Management System to streamline and automate material stock processes across the warehouse and production flows.

- Implemented real-time stock updates for receiving, picking, cycle counting, and returns.
- Integrated incoming material updates for accurate inventory tracking.
- Developed seamless material picking updates reflecting outgoing transactions.
- Supported cycle count activities ensuring stock accuracy.
- Enhanced material return tracking from production areas.

**Database Administrator (Intern), Permodalan Nasional Madani**          Feb 2024 - Jun 2024

Managed and maintained the organization's database to ensure high availability, reliability, and efficiency.

- Conducted database maintenance to prevent operational issues.
- Identified user needs and managed database configurations.
- Performed regular database backups and recovery processes to prevent data loss.

**Admin & Web Developer (Intern) - Supernova Flexible Packaging**        Aug 2023 - Dec 2023

Managed and maintained the organization's database to ensure high availability, reliability, and efficiency.

- Prepared Excel formulas for TPM dashboard metrics such as MTTR, MTBF, PM, EHI, Tagging, and Breakdown.
- Developed a web-based Breakdown Dashboard, transitioning manual reporting into a digital system.

**Coffeeshop website**                                                    Nov 2022 - Dec 2022

Managed and maintained the coffeeshop's price list and menu.
